IT Infrastructure Security Engineer – Farmers Branch

Job Ref: 20181010

Responsibilities:

- Ensure and assist with the proper deployment and management of solutions that support IT Infrastructure security including virus detection, malware detection, intrusion detection and prevention systems, firewalls, and other security solutions.
- Review system hardware/software design and architecture documentation and provide recommendation addressing security technical issues.
- Be responsible for operating, tuning, and reviewing maintenance of all infrastructure security tools, software suites, devices, appliances and systems.
- Review & monitor various security tools and recognize problems by identifying abnormalities. Provide detailed Risk Assessment reports on daily/weekly or ad hoc basis.
- Identify, evaluate and implement technical security controls to continuously improve the organization's security posture.
- Develop technical solutions and new security tools to help mitigate security vulnerabilities and automate repeatable tasks.
- Work with internal and external auditors to provide requested information and perform remediation if necessary.
- Work with executive team to prioritize security initiatives and spending based on appropriate risk management and/or financial methodology.
- Write comprehensive reports including assessment-based findings, outcomes and propositions for further system security enhancement.

Qualifications:

- Bachelor's Degree in Computer Science or Information Systems required
- Minimum of 5+ years of experience in managing IT Infrastructure Security solutions
- Computer Information Systems Security Professional (CISSP) or similar security industry certification
- Strong understanding of NIST, ISO, Cybersecurity Framework and other security industry guidelines
- Hands on experience in security systems, including firewalls, intrusion detection systems, anti-virus software, authentication systems, log management, content filtering, etc
- Security Tools experience: CyberArk, CloudLock, ProofPoint, McAfee, Trend Micro, scanning/pen testing tools
- Demonstrated analytical and problem-solving abilities to identify and remediate security risks
