

*Permanent Placement & Consulting Services in Information Technology*

### **Program Manager, Big Data & Analytics – Fort Worth, TX**

Support this global business through effective program management, to define, design, and deliver a robust and rich big data & analytics platform. The ideal candidate has successfully led teams to deliver cloud solutions using Scrum based Agile. Coordinating a diverse, global team with a mixture of partners and subject matter experts is required. This person must be a self-starter, a champion for the team, and passionate about delivering quality products.

#### **Project Management:**

- Work closely with the business' engineering departments (in excess of 20 teams globally) as well as other business functions to ensure alignment and delivery of a common big data platform.
- Ensure successful completion of the projects, expressed as customer satisfaction, contractual compliance, project quality, schedule and financial outcomes.
- Develop, maintain and manage Scrum based Agile projects and Waterfall program plans.
- Monitor project related expenditure and make recommendations
- Communicate scope, risks, blockers, and schedules.
- Act as 'Scrum Master' to squads.
- Manage change management activities needed for successful implementation.
- Provide regular communications to businesses and stakeholders with regular reporting in to the broader digital program. Includes timely submission of monthly reports and 'as required' reports on the progress of the project and issues relating to the project.
- Manage vendor dependencies and deliverables providing services to the project.
- Establish and manage a schedule of project team meetings / playbacks / standups/ retrospectives to review the progress of the project and ensure control over project activities.
- Lead post-implementation (playback) reviews and continuous improvement feedback sessions.
- Develop and utilize Agile and PM best practice processes and methodologies for implementation designed for divisional and business unit adoption.
- Establish KPI's and measure team "health" and performance and pro-actively work to ensure a highly functioning team
- Act as the team advocate

#### **Product Lifecycle Management:**

- Coordinate end to end platform / capability delivery - from conception, prototype through to post delivery and support.

#### **Customer Support:**

- Coordinate applicable training ensuring it is relevant, user friendly and current, and that training is integral to the project plan.
- Develop and foster strong relationships with both the Customers and Suppliers.
- Establish and measure KPI's to ensure successful delivery of quality products

#### **Governance:**

- Ensures technology development projects align to the Weir New Product Introduction and Agile Development processes.
- Ensures necessary reporting and approval frameworks are followed for all technology development projects.
